

Paul Totah

Product Management | B2B SaaS | AI-Assisted Product Workflows | Revenue Intelligence
Bothell, WA | (617) 230-1137 | paultotah@gmail.com | www.paul-totah.com | linkedin.com/in/paultotah

PROFESSIONAL SUMMARY

Product Manager who solves complex workflow problems and turns customer pain points into clearer product experiences. Experienced in B2B SaaS, reporting, forecasting, product analytics, AI-assisted product workflows, and revenue intelligence, with deep hospitality operator context. Strong at connecting user needs, business goals, and technical execution to help teams make better decisions.

CORE COMPETENCIES

Product Management: Product Strategy, Roadmaps, Customer Discovery, Product Requirements, PRDs & User Stories, Go-to-Market, Product Experimentation, Product Launch, KPIs & Success Metrics, API & Integration Discovery, AI-Assisted Product Workflows

Execution & Delivery: Backlog Prioritization, Agile/Scrum/Kanban, Stakeholder Alignment, Root Cause Analysis, Release Readiness, UAT, Feature Adoption

Analytics & Domain: Product Analytics, Revenue Intelligence, Revenue Management, Dynamic Pricing, Forecasting, Reporting & Dashboard Products, BI / Reporting Workflows

Tools & Technical: Generative AI, Claude Code, Cursor, MCP / Model Context Protocol, Pendo, GitHub, Render, SerpAPI, Lovable, REST APIs

EXPERIENCE

Duetto, San Francisco, CA (Remote)

October 2024 - March 2026

Product Manager

Owned product strategy and roadmap execution for reporting, dashboards, forecasting, and revenue intelligence workflows within Duetto's B2B SaaS revenue management platform, used by 6,300+ hotels worldwide.

- Managed reporting, dashboard, and forecasting products used by revenue managers, GMs, and corporate revenue teams to make daily pricing, inventory, and demand decisions.
- Reduced bug review time by 50% and shortened defect resolution cycles from months to weeks by building an AI-assisted PM workflow across triage, issue investigation, and documentation.
- Drove 7% year-over-year growth in report engagement by identifying reporting friction through Pendo analytics and customer discovery, then prioritizing usability improvements that made forecasting insights easier for hotel teams to find and use.
- Reduced reporting backlog by 15% by improving intake quality before engineering review, adding clearer defect reproduction, issue classification, and customer impact detail.
- Cut support tickets by 10% by closing gaps in forecasting model documentation that created avoidable support volume, strengthening CS, Sales, and sales support teams' ability to address adoption, escalation, and renewal questions.
- Identified and shaped two net-new platform opportunities after uncovering recurring customer reporting and profitability gaps: a Reporting API for BI tool exports and a post-acquisition data integration that translated newly acquired profitability data into roadmap opportunities for Duetto's reporting and revenue intelligence products.
- Turned customer discovery with global revenue leaders into roadmap priorities by identifying where forecasting workflows broke down, why adoption stalled, and what hotel teams needed to act on pricing and demand insights.
- Partnered with Data Science and Engineering to pressure-test pricing model behavior against real hotel booking patterns, helping align model outputs with how revenue managers actually make decisions.
- Improved release quality for reporting enhancements by tightening customer validation, activation tracking, UAT, opt-in beta testing, and release feedback loops.

SAP Ariba, Bellevue, WA

January 2019 - May 2024

Strategic Customer Manager

Managed high-visibility enterprise SaaS accounts within SAP Ariba's Product Success organization, owning product-related escalations, go-live blockers, feature adoption risks, and customer feedback that informed product and engineering intake across a €45M ACV portfolio.

- Served as the customer-facing bridge between Product, Engineering, and high-visibility enterprise customers, translating product quality issues, go-live blockers, adoption risks, and customer feedback into engineering intake, product requirements, customer collateral, and executive-ready resolution plans.

- Reduced escalations by 40% by addressing recurring breakdowns across product behavior, implementation gaps, adoption barriers, and customer workflow friction. Diagnosed root causes and coordinated resolution across Product, Engineering, Support, and Customer Success.
- Unblocked enterprise go-lives by addressing unclear ownership and unresolved product issues that delayed implementation. Translated customer blockers into actionable product and engineering intake, aligning stakeholders on severity, customer impact, and path to resolution.
- Improved product adoption by 10% by helping customers move from implementation risk to successful go-lives, feature activation, and issue resolution.

Pan Pacific Hotel Seattle, Seattle, WA

October 2017 - October 2018

Director of Sales, Marketing & Events

Led commercial strategy for a 153-room luxury urban hotel where sales, marketing, and events needed tighter alignment around demand patterns, segment performance, and revenue opportunity. Oversaw six direct reports across sales, business travel, event planning, and event leadership while managing \$8M in annual rooms and F&B revenue responsibility, representing 46% of the hotel's budgeted revenue.

- Exceeded annual revenue targets by 11%, generating \$1M in incremental revenue through focused segment strategy, demand-based pricing, and coordinated sales, marketing, and event planning.
- Grew qualified sales pipeline 10% year-over-year through targeted outreach, multi-channel prospecting, and demand-gap-focused account development.

Hyatt Regency Bellevue on Seattle's Eastside, Bellevue, WA

September 2013 - September 2017

Associate Director of Sales & Marketing

Managed corporate and group sales strategy for an 800+ room convention and business travel hotel where revenue performance depended on long-cycle account development, group demand capture, and consistent team production. Oversaw \$16M-\$20M in annual corporate and group revenue responsibility, accounting for an average of 44% of hotel revenue per year, and directly managed two junior Sales Managers.

- Surpassed individual production targets by an annual average of 12% by focusing account strategy on high-value corporate and group opportunities, long-cycle relationship development, and demand periods with the greatest revenue upside.
- Secured a key technology account that contributed 25% of total hotel group revenue annually through targeted prospecting, relationship development, and sustained account ownership.
- Improved sales team performance by mentoring and managing six junior Sales Managers over four years, supporting four promotions to Sales Manager and helping the team exceed production goals by an average of 8%.

PORTFOLIO WORK

Hotel Multi-Date Rate Scanner | Live Demo: hotelscanner.paul-totah.com | GitHub Repo | Case Study

- Identified a hotel-shopping workflow gap for flexible travelers who already have a hotel or shortlist in mind: comparing rates across multiple date windows requires searching each date combination manually. Took the problem from PRD to working prototype, including user stories, success metrics, phased roadmap, and functional delivery.
- Built the prototype as a decision-support experience that surfaces the lowest-cost option, preserves partial results when searches fail, and routes users directly to booking paths with dates pre-populated. Applied product judgment across problem framing, UX tradeoffs, live data integration, and AI-assisted execution.

EDUCATION

Master of Tourism Administration, The George Washington University School of Business

Master of Public Administration, Northeastern University

Bachelor of Arts, Psychology, Boston University
