

Paul Totah

Product Manager | Enterprise SaaS | AI Workflows | Revenue Intelligence

Bothell, WA | (617) 230-1137 | paultotah@gmail.com | www.paul-totah.com | linkedin.com/in/paultotah

PROFESSIONAL SUMMARY

Product Manager with a hospitality operator background and enterprise SaaS experience, focused on building AI-assisted, data-driven products that help teams make better decisions. Spent a decade leading commercial and revenue teams at hotels before owning analytics, reporting, and forecasting products those teams depend on. Background includes direct product ownership at Duetto and enterprise customer adoption experience at SAP, with a customer success lens on discovery, requirements definition, onboarding, and post-launch adoption.

CORE COMPETENCIES

Product Management: Product Strategy, Roadmaps, Customer Discovery, PRDs & User Stories, GTM, Product Experimentation, KPIs & Success Metrics, API & Integration Discovery, AI-Assisted Product Workflows

Execution & Delivery: Backlog Prioritization, Agile/Scrum/Kanban, Stakeholder Alignment, Root Cause Analysis

Analytics & Domain: Product Analytics, Revenue Intelligence, Revenue Management, Dynamic Pricing, Forecasting, Data-Driven Decision Systems

Tools & Platforms: Claude Code, Cursor, MCP, Pendo Product Cloud, Jira, Confluence, Salesforce

EXPERIENCE

Duetto, San Francisco, CA (Remote)

October 2024 - March 2026

Product Manager

Owned product strategy and development for reporting, dashboards, and forecasting applications within Duetto's revenue management platform, used by 6,300+ hotels worldwide.

- Built an AI-assisted PM workflow using Claude Code, Cursor, and MCP that reduced bug review time by 50% and helped shorten customer response cycles from months to weeks across defect triage, issue investigation, and documentation.
- Drove 7% year-over-year growth in report engagement by combining Pendo product analytics, customer discovery, and revenue leader feedback to identify workflow friction, improve data surfacing, and refine how forecasting insights were presented across budgeting and pricing workflows.
- Prototyped reporting enhancements and partnered with Engineering to shape BETA release mechanics, including opt-in testing, activation tracking, suggested improvements, and known behavior documentation to improve launch readiness and create a clearer feedback path for customer validation.
- Reduced the backlog 15% by reproducing and classifying defects before engineering intake, helping the team focus roadmap capacity on high-value reporting UX work.
- Improved internal and customer-facing documentation for forecasting models, reducing support ticket volume 10% and strengthening CS, Sales, and sales support teams' ability to address client questions during adoption, escalation, and renewal conversations.
- Identified and shaped two net-new platform opportunities through workflow analysis and customer discovery: a Reporting API for BI tool export, prioritized based on customer input and recurring BI workflow needs, and an external profitability data integration, prioritized around Duetto's HotStats acquisition and broader revenue intelligence strategy.
- Led ongoing customer research and discovery with revenue leaders across global hotel chains, translating workflow patterns and adoption barriers into roadmap priorities that directly addressed the gap between forecasting outputs and user action.
- Partnered with Data Science and Engineering to evaluate pricing model performance and support experimentation around elasticity assumptions, contributing revenue management context that helped align model behavior with real-world hotel booking patterns.

SAP Ariba, Bellevue, WA

January 2019 - May 2024

Strategic Customer Manager

Managed high-visibility enterprise accounts within SAP Ariba's Product Success organization, owning product-related escalations, go-live blockers, and critical adoption risks across a €45M ACV portfolio.

- Served as the customer-facing bridge between Product, Engineering, and high-visibility enterprise customers, translating product quality issues, go-live blockers, and adoption risks into engineering intake, customer collateral, and executive-ready resolution plans.

- Reduced escalations by 40% by diagnosing root causes across product behavior, implementation gaps, adoption barriers, and customer workflow friction, then coordinating resolution across Product, Engineering, Support, and Customer Success.
- Unblocked enterprise go-lives by translating customer issues into actionable product and engineering intake, aligning stakeholders on severity, customer impact, and path to resolution.
- Improved product adoption and value realization by 10% by guiding feature activation, resolving critical issues, and helping customers move from implementation risk to usable business outcomes.

Pan Pacific Hotel Seattle, Seattle, WA

October 2017 - October 2018

Director of Sales, Marketing & Events

Led commercial strategy across sales, marketing, and events for a 153-room luxury urban hotel, overseeing six direct reports across sales, business travel, event planning, and event leadership while managing \$8M in annual rooms and F&B revenue responsibility (46% of hotel budgeted revenue).

- Exceeded annual revenue targets by 11%, generating \$1M in incremental revenue by aligning sales, marketing, and event strategy around demand-based pricing and targeted segment growth.
- Grew qualified sales pipeline 10% year-over-year through multi-channel lead generation and outreach tied to demand gaps.

Hyatt Regency Bellevue on Seattle's Eastside, Bellevue, WA

September 2013 - September 2017

Associate Director of Sales & Marketing

Managed corporate and group sales strategy for an 800+ room convention and business travel hotel generating \$16M-\$20M in annual revenue, with direct oversight of two junior Sales Managers.

- Surpassed individual production targets by an annual average of 12% while coaching two junior Sales Managers toward production goals.
- Secured a key technology account that contributed 25% of total hotel group revenue annually through targeted prospecting and long-cycle relationship development.
- Mentored and managed six junior Sales Managers over four years, supporting 4 promotions to Sales Managers and helping the team exceed production goals by an average of 8%.

PORTFOLIO WORK

Hotel Multi-Date Rate Scanner (Live Demo) | hotelscanner.paul-totah.com | [GitHub Repo](#) | [Case Study](#)

- Identified a hotel-shopping workflow gap for flexible travelers who already have a hotel or shortlist in mind: comparing rates across multiple date windows requires searching each date combination manually. Took the problem from PRD to working prototype, including user stories, success metrics, phased roadmap, and functional delivery using Claude Code, SerpAPI, Lovable, GitHub, and Render.
- Built the prototype as a decision-support experience rather than a data table, surfacing the lowest-cost option, preserving partial results when searches fail, and routing users directly to booking paths with dates pre-populated. Showcases product judgment across problem framing, UX tradeoffs, live data integration, and AI-assisted execution.

EDUCATION

Master of Tourism Administration (MTA), The George Washington University School of Business

Master of Public Administration (MPA), Northeastern University

Bachelor of Arts, Psychology, Boston University

CERTIFICATIONS

Professional Certificate, Software Product Management, University of Washington
