

Paul Totah

Product Management | B2B SaaS | Analytics & Reporting Products | Revenue Intelligence | Product Strategy

121 161st PL SE, Bothell, WA 98012 | (617) 230-1137 | paultotah@gmail.com | www.paul-totah.com | www.linkedin.com/in/paultotah/

PROFESSIONAL SUMMARY

Product Manager with B2B SaaS experience across reporting, forecasting, and analytics products, paired with more than a decade of hospitality sales and revenue leadership that grounds product decisions in how operators actually use data. Owned reporting and forecasting products used by 6,300+ hotels and reduced bug review time 50% through AI assisted triage and documentation. Approaches product work by understanding the user's workflow, identifying the decision they're trying to make, and building what makes the next action clearer.

CORE COMPETENCIES

Product Management: Product Strategy, Roadmaps, Customer Discovery, Product Requirements, PRDs & User Stories, Go-to-Market, Product Experimentation, Product Launch, KPIs & Success Metrics, API & Integration Discovery, AI-Assisted Product Workflows

Execution & Delivery: Backlog Prioritization, Agile/Scrum/Kanban, Stakeholder Alignment, Root Cause Analysis, Release Readiness, UAT, Feature Adoption

Analytics & Domain: Product Analytics, Revenue Intelligence, Revenue Management, Dynamic Pricing, Forecasting, Reporting & Dashboard Products, BI / Reporting Workflows

EXPERIENCE

Duetto, San Francisco, CA (Remote)

October 2024 - March 2026

Product Manager

- Owned reporting, dashboard, and forecasting and budgeting products within Duetto's B2B SaaS revenue management platform, used by 6,300+ hotels worldwide, enabling faster daily pricing, inventory, and demand decisions for revenue managers, GMs, and corporate revenue teams
- Reduced bug review time by 50% and shortened defect resolution cycles from months to weeks by building an AI-assisted PM workflow across triage, issue investigation, and documentation
- Drove an investigation into uneven report engagement behind a 7% year-over-year increase, using Pendo analytics and customer discovery to determine which reports needed fixes and which should be sunset
- Reduced reporting backlog by 15% by improving intake quality before engineering review, adding clearer defect reproduction, issue classification, and customer impact detail
- Helped reduce the analytics backlog by 25% by improving intake, prioritization, and coordination across customer requests, product needs, and technical work
- Cut support tickets by 10% by closing gaps in forecasting model documentation that created avoidable support volume, helping CS, Sales, and Solutions teams address adoption, escalation, and renewal questions
- Identified and shaped two net-new platform opportunities after uncovering recurring customer reporting and profitability gaps: a Reporting API for BI tool exports and a post-acquisition data integration that translated newly acquired profitability data into roadmap opportunities for Duetto's reporting and revenue intelligence products
- Turned customer discovery with global revenue leaders into roadmap priorities by identifying where forecasting workflows broke down, why adoption stalled, and what hotel teams needed to act on pricing and demand insights
- Supported analytics initiatives across forecasting, price elasticity, and budgeting, partnering with Data Science and Engineering to pressure-test pricing model behavior against real hotel booking patterns and align model outputs with how revenue managers actually make decisions
- Improved release quality for reporting enhancements by tightening customer validation, activation tracking, UAT, opt-in beta testing, and release feedback loops

SAP Ariba, Bellevue, WA

January 2019 - May 2024

Strategic Customer Success Manager

- Translated quality gaps, go-live blockers, and adoption risks across a €45M ACV portfolio into prioritized engineering intake and clear resolution plans as the product-facing lead for high-visibility enterprise accounts within SAP Ariba's Product Success organization
- Defined product requirements for major enterprise customer issues, translating quality gaps, go-live blockers, and adoption risks into prioritized engineering intake and clear resolution plans

- Reduced escalations by 40% by addressing recurring issues across product behavior, implementation gaps, adoption barriers, and customer workflow pain points
- Unblocked enterprise go-lives by addressing unclear ownership and unresolved product issues that delayed implementation; translated customer blockers into actionable product and engineering intake, aligning stakeholders on severity, customer impact, and path to resolution
- Improved product adoption by 10% by helping customers move from implementation risk to successful go-lives, feature activation, and issue resolution

Pan Pacific Hotel Seattle, Seattle, WA

September 2017 - October 2018

Director of Sales, Marketing & Events

Led commercial strategy for a 153-room luxury urban hotel where sales, marketing, and events needed tighter alignment around demand patterns, segment performance, and revenue opportunity. Oversaw six direct reports across sales, business travel, event planning, and event leadership while managing \$8M in annual rooms and F&B revenue responsibility, representing 46% of the hotel's budgeted revenue.

- Exceeded annual revenue targets by 11%, generating \$1M in incremental revenue through focused segment strategy, demand-based pricing, and coordinated sales, marketing, and event planning
- Grew qualified sales pipeline 10% year over year through targeted outreach, multi-channel prospecting, and demand-gap-focused account development

Hyatt Regency Bellevue on Seattle's Eastside, Bellevue, WA

September 2013 - September 2017

Associate Director of Sales & Marketing

Managed corporate and group sales strategy for an 800+ room convention and business travel hotel. Focused on long-cycle account development, group demand, and team production.

- Managed \$16M to \$20M in annual corporate and group revenue responsibility, accounting for an average of 44% of hotel revenue per year, and directly managed two junior Sales Managers
- Surpassed individual production targets by an annual average of 12% by focusing account strategy on high-value corporate and group opportunities, long-cycle relationship development, and demand periods with the greatest revenue upside
- Secured a key technology account that contributed 25% of total hotel group revenue annually through targeted prospecting, relationship development, and sustained account ownership
- Improved sales team performance by mentoring and managing six junior Sales Managers over four years, supporting four promotions to Sales Manager and helping the team exceed production goals by an average of 8%

PORTFOLIO WORK

Hotel Multi-Date Rate Scanner | [Live Demo](#) | [Case Study](#)

- Identified a hotel-shopping workflow gap for flexible travelers who already have a hotel or shortlist in mind: comparing rates across multiple date windows requires searching each date combination manually. Took the problem from PRD to working prototype, including user stories, success metrics, phased roadmap, and functional delivery
- Built the prototype as a tool that helps travelers compare options, surface the lowest-cost dates, preserve partial results when searches fail, and route users directly to booking paths with dates pre-populated. Made tradeoff decisions across problem framing, UX, live data integration, booking-link logic, and AI-assisted development
- Expanded the tool from a limited hotel set to worldwide search based on user feedback, and changed its data architecture after rate accuracy fell short of expectations, improving result reliability

EDUCATION

Master of Tourism Administration, The George Washington University School of Business

Master of Public Administration, Northeastern University

Bachelor of Arts, Psychology, Boston University
